

# Town of Wasaga Beach

## Drainage Master Plan

### Notice of Public Information Centre 1

The Town of Wasaga Beach has initiated a Drainage Master Plan under the Municipal Class Environmental Assessment Master Planning Process to identify existing drainage deficiencies and develop drainage solutions to address the deficiencies, reduce flooding, resolve public safety concerns, and improve maintenance opportunities within the settlement areas of the Town. An initial Public Information Center is planned to advise you of the drainage deficiencies identified through the initial stages of the project, gather comments on any additional deficiencies and elicit comment on the potential solutions that are being considered.

The study area encompasses the entire Town of Wasaga Beach. The general boundaries are Fairgrounds Road to the west, Allenwood Beach to the east and Georgian Bay to the north. The existing drainage infrastructure in the study area consists of a combination of open channels, ditches, watercourses, culverts, storm sewers, overland flow routes, stormwater management facilities, and low impact development measures.

The Drainage Master Plan is being completed in accordance with Approach #2 of the Master Planning Process outlined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, amended in 2007, 2011, and 2015). The Town has retained the consulting firm Tatham Engineering Limited to complete this Drainage Master Plan.

The Town hereby notifies all interested individuals and parties that a Public Information Centre (PIC) will be held from 6:00 pm to 8:00 pm on October 20, 2022 at the RecPlex Community Centre. The format will consist of a presentation (which will be posted to the Town's website <https://www.wasagabeach.com/en/town-and-government/studies.aspx>) followed by an open discussion period. Comment sheets will be provided to allow members of the public and interested stakeholders to comment on any specific drainage concerns, indicate preferences regarding the improvement options being considered and provide overall comments regarding satisfaction with the presentation. Town staff and representatives from Tatham Engineering Limited will be available at this meeting to discuss issues and concerns with members of the public. Comments collected through this process will be used to develop the alternative drainage solutions for evaluation. A second PIC will be held once the preliminary preferred alternative solutions are established.

Additional information related to the Drainage Master Plan is available on the Town of Wasaga Beach website ([www.wasagabeach.com/en/town-and-government/studies.aspx](http://www.wasagabeach.com/en/town-and-government/studies.aspx)). Should additional information be required or to be added to the project mailing list, please contact:
